Etuge Marxsim Junior

Front-End Developer · UI/UX Design

Douala, Cameroon · etugemarxsimjunior@gmail.com · LinkedIn · GitHub · Portfolio

PROFILE

Front-end developer with a strong UI/UX design practice. I design interfaces in Figma first, then build them in React. Agency internship in Douala and a deployed final-year project (React, TypeScript, Django). Looking for an internship or junior role in front-end development or product, and open to freelance projects.

SKILLS

Languages	JavaScript, TypeScript, Python, HTML5, CSS3, PHP (basics)
Front end	React, Next.js, Vite, Tailwind CSS
Back end	Django, Node.js, Express, REST APIs, JWT
Database	PostgreSQL
Design	Figma (mockups before development), Canva, Affinity
Tools	Git, GitHub, GitLab, Postman, Firebase Cloud Messaging, Vercel, Railway

EXPERIENCE

Front-End Developer Intern · Sunshine Advisory, Bonanjo, Douala
March to June 2025 · Next.js, Git, GitLab

- Built user-facing web interfaces with Next.js and turned UI mockups into web pages.
- Improved usability and the overall user experience.
- Worked in a team with Git and GitLab.

IT Trainer · ISTIA Cameroun, Douala
July to September 2025

- Ran tutoring classes in computer science for nearly 50 scholarship students across several campuses.
- Strengthened core IT skills and followed each student's progress.

PROJECTS

Campus Info, academic notification platform (final-year project)
Figma, React, TypeScript, Vite, Tailwind CSS, Django, Firebase Cloud Messaging · Live demo

- Problem: academic announcements were scattered and reached students late. Solution: one platform for students, teachers and administration.
- Role-based experience with strict access control; push and e-mail notifications. Mockups designed in Figma before development.
- Checked with classmates' accounts (role access, notifications received). Django API tested with Postman; front end on Vercel, back end on Railway.

Drink Manage, depot management app (in development, with a back-end colleague)
Figma, React, JavaScript, Node.js, Express, PostgreSQL, Electron · private repository

- Offline-first app for drink depots: supplier stock entries, returnable crates, damages, credit sales and PDF reports, installed on the depot's local network.
- My part: UI/UX design, user research, usability testing and front-end development.

EDUCATION

Licence de Technologie, Software Engineering · IUT of Douala
2025 to 2026 · Defense passed, certificate obtained, diploma being issued
